Susan Bussell, R.D., Kim Donnelly, R.Ph., Scott Helton, M.D., Susan Kracke, R.Ph., Robert Labbe, Ph.D., Edward Lipkin, M.D., Ph.D., Jill McCormick, M.S., R.D., Patricia Riley, R.D., Megan Veldee, M.S., R.D., Sarah Washburn M.S., R.D., and thanks to Jana Huddleston, for her computer and word processing support.

Table of Contents

Topic	Page Number
I. Introduction	1
II. Nutritional Assessment	2
A. Risk Factors	
B. Diet History	
C. Medical History	
D. Physical Examination	
E. Subjective Global Assessment	
F. Laboratory Tests	
III. Estimating Nutritional Requirements	4
A. Determine Ideal or “Adjusted” Body Weight	
B. Energy Requirements	
C. Protein Requirements	
D. Fluid Requirements	
E. Electrolyte Requirements	
F. Fat Requirements	
G. Micronutrient Requirements	

- IV. Nutritional Therapy Options 9
 - A. Nutrition Modalities
 - 1. Oral Diet
 - 2. Enteral Nutrition
 - 3. Parenteral Nutrition

- V. Enteral Nutrition 11
 - A. Tube Placement Options
 - 1. Nasoenteric Feeding Tubes
 - 2. Tube Enterostomy
 - B. Formula Selection
 - C. Administration Guidelines
 - 1. Initiation and Progression
 - 2. Calculate Additional Fluid Requirements
 - 3. Transition to Cyclic or Bolus Feedings
 - 4. Vitamin and Mineral Requirements
 - 5. Monitoring
 - D. Writing Enteral Nutrition Orders
 - E. Medications and Enteral Nutrition
 - F. Complications of Enteral Nutrition Therapy

- VI. Parenteral Nutrition 24
 - A. Access Routes and Catheter Placement
 - 1. Access Routes
 - 2. Catheter Placement Requests
 - B. Initiating Parenteral Nutrition
 - 1. Formula Determination
 - 2. Writing Parenteral Nutrition Orders
 - C. Administration Guidelines
 - D. Medications and Parenteral Nutrition
 - E. Complications of Parenteral Nutrition Therapy

- VII. Monitoring Nutritional Therapy 37
 - A. Physical Examination
 - B. Functional Assessment
 - C. Laboratory Tests
 - 1. Basic Test Schedule
 - 2. Nitrogen Balance
 - 3. Protein-energy Balance Markers
 - 4. Evaluating Acid/Base Balance
 - 5. Vitamins and Minerals
 - 6. Liver Dysfunction
 - D. Short Gut Syndrome
 - E. Refeeding Syndrome

VIII. Appendices 45

- A. Common Drug and Nutrient Interactions
- B. Physical Signs Suggestive of Nutrient Deficiencies
- C. Nutrition Assessment Protocol
- D. Nutrition-Related Lab Tests
- E. Metropolitan Life Insurance Ideal Body Weights
- F. Estimating Energy Requirements
- G. Essential Nutrients in Human Metabolism
- H. Diagnosis of Nutritional Anemias

XI. Recommended Readings 64
